

# HISTORY

**NAV-X History** provides an easy to use and easy to implement tracking system of your data changes. If you have questions about who changed a specific record, when was it changed, and what the old values were. You can choose field by field and table by table, which data should be tracked. Easily accessible on all relevant pages, **NAV-X History** will be there to answer your questions.

## How does it work?

**NAV-X History** allows the configuration field by field and table by table to only store the data that is actually relevant for you. It uses the standard Microsoft Dynamics NAV functionality "Change Log" and adds the ability to easily understand data changes for specific records.

It installs itself on all pages that are based on history tracked tables to allow access to the tracked data. It also removes itself easily from those pages, for instance, when you are ready to upgrade.

Different than other history tracking solutions, **NAV-X History** allows the complete tracking of any tables or fields installed by an extension. Easy to use and easy to implement, **NAV-X History** is the answer for your compliance needs.

## Features:

- Built on top of standard Microsoft Dynamics NAV functionality
- Tracks changes to data made by users or the system internally
- Easy to install and uninstall
- Easy to use
- History buttons available on all tracked pages

## How to buy?

**NAV-X History** is available from our authorized resellers. Need help? Is your partner not one of our authorized resellers? Contact us and we will work with your partner.

Dynamics NAV

HISTORY CARD - TABLEDATA - 18

Row No.	Primary Key Field 1 Caption	Primary Key Field 1 Value	Primary Key Field 2 Caption	Primary Key Field 2 Value	Date and Time	User ID	Type Of Change

## HISTORY

### About NAV-X LLC

NAV-X, with its roots deep in the rich history of Microsoft Dynamics NAV in the North American market, is a publisher of functionality commonly required by distribution and manufacturing business, but unavailable in native NAV. Since 1996, our team has been developing this functionality and built a portfolio of Best Practice solutions. These solutions provide our clients with reliable and repeatable competitive advantages.

In 2012, NAV-X became a certified embed partner with Microsoft and received the "CfMD" (Certified for Microsoft Dynamics) product certification on our complete suite and a Gold ERP Competency. This suite contains over 10,000 hours of integrated functionality that showcased solutions utilized by over 700 companies.

As our clients know, we take great pride in earning their respect and business on a daily basis. We strive to exceed our customer's expectations. In 2015, we became the first partner in North America to successfully migrate our products into the new Dynamics NAV extensions protocol. In 2016, we became the first US Dynamics Partner to achieve Cloud Services Provider tier 1 status and achieved our Gold Cloud Competency with Microsoft.

Our Customer network allows us to define and refine the next generation of products and help helped us create the next 20 enhancements that are in our product development pipeline.

Our solutions are available to Customers on Dynamics365, or through your Dynamics NAV Partner.
